BVJ-X

Prices subject to change without notice.

Our vacuum-bulb type tools are the lowest cost pick-and-place tools available. These tools operate very similar to a tweezer. Simply squeeze the vacuum bulb, place the soft suction cup to the part to be handled, then relax your squeeze and the part is firmly gripped. A second squeeze releases the part.

**HANDI-VAC® KIT**  
2 3/4" (69.85mm) long  
1/2" (12.7mm) diameter

Squeeze bladder for suction

Black Static Dissipative rubber
